Shaping Possibilities

Feature Project ■ NIAGARA FALLSVIEW CASINO RESORT, GAMING PIT #5

Industry: Gaming Location: Niagara Falls, Canada Design: Dougall Design Associates Inc.

■ Inside ellipse panel highlights dimensionally accurate components that supported an efficient field installation.

Concept

When the Ontario Lottery and Gaming Corporation invested \$1 billion dollars to create a world class casino resort in Niagara Falls, Formglas was chosen as the sole supplier of glassfiber reinforced gypsum (GRG) products to help create a unique "Las Vegas of the North" feel.

Specs

- GRG elliptical bulkhead manufactured from multiple profiles and featuring raised ribbon and rosette details, GRG beam moldings and large floral elements.
- Drawings outlining framing and drywall substrate locations, along with installation sequence guidance and field support were provided by Formglas.
- Factory applied colored primer accelerated final site finishing.

Technical Specifications

Interior Design Drawing

- Manufacturing production drawings provided clear instructions that supported timely installation.

Final Product

Custom molded products by Formglas for interior and exterior design applications are specified by more designers and architects than any other products of their kind in the world. For more than four decades, Formglas has supplied the commercial building and design industry worldwide with the highest quality molded stone and concrete textured finishes, luxurious cold cast metallics and precision engineered cast gypsum surfaces. Our team of architecturally-trained product specialists work closely with designers and architects to create practical and cost-effective solutions that reduce installation cost, provide enhanced appearance and ensure years of durability and beauty. Best of all, Formglas products and services are backed by the industry standard for quality, service and on-time delivery.
